

PRIME 6000R VC

Our Prime 6000R VC is a recycled, environmentally friendly, general-purpose ABS (Acrylonitrile-Butadiene-Styrene) sheet with a co-extruded Virgin cap. This product is designed for general thermoforming applications.

Offers good impact strength, and good hot strength for thermoforming.

Customisation

All Primex grades are formulated with the user in mind, and various modifications for products are possible.

Primex has a PRIME grade suitable for your application. Please get in touch with your usual Primex contact to discuss

Prime 6000R VC ABS can be colour matched to meet your specific requirements.

Sustainability

Sustainability includes considering the product's circularity or end of life during the design of the finished product. Prime 6000R VC ABS (recycle code 7) can be recycled as a post-industrial or post-consumer product..

Primex Sustainability: A better tomorrow, starting today!

PRIME 6000R VC ABS | Data Sheet

Prime 6000R VC ABS is an amorphous thermoplastic material and therefore, processes easier than some other thermoplastic materials.

Applications

Prime 6000R VC ABS may be used for interior applications such as appliance parts, tub/ shower surrounds, pick-up truck caps, boat accessories, and automotive trim parts. With the addition of a weatherable cap it may also be used in many outdoor application.

Finishing

Prime 6000R VC ABS may be joined with machine screws, bolts, nuts, rivets, and spring steel fasteners. Thread cutting or threadforming screws is an economical means of securing separate joints. Formed parts may be joined with Methylene Chloride if maximum impact strength is not required. Press and snap techniques, and sonic welding may also be used for the bonding of Prime 6000R VC ABS.

Colours, Textures, and Capabilities

Prime 6000R VC ABS is available in thicknesses from1mm-6mm. Textures include; pinseal, balmoral, smooth.

| Property | Standard | Unit | Value | |
|--------------------------------|------------------------------|----------|--------------|--|
| Melt Volume Rate 230 °C 3.8 kg | ISO 1133 | g/10min | 2.2 | |
| Density | ASTM D792 | g/cm3 | 1.06 | |
| Heat Deflection Temp | ASTM D648 Method A @ 264 psi | °C | 89 | |
| Vicat Softening Temp | ASTM D1525 | ٥C | 129 | |
| Tensile Strength | ASTM D638 (50 mm/min) | N/mm2 | 30 to 36 | |
| Tensile Elongation @ Break | ASTM D638 (50 mm/min) | % | 68 to 72 | |
| Tensile Strength | ISO 3795 (50 mm/min) | N/mm2 | 30 to 34 | |
| Tensile Elongation @ Break | ISO 3795 (50 mm/min) | % | 25 to 29 | |
| Flexural Modulus | ASTM D790 | N/mm2 | 1900 to 2000 | |
| Flexural Strength | ASTM D790 | N/mm2 | 45 to 50 | |
| Notched Izod | ASTM D256 | Ft-lb/in | 3 to 3.5(PB) | |
| Burn Rate | ISO 3795 | mm/min | 24 to 32 | |
