

Date of the declaration: 05/08/2026

Declaration of compliance - PPWR update statement:

Ahead of the application of the EU Packaging and Packaging Waste Regulation (PPWR) (replacing Regulation EU 2025/40) on August 12th 2026, please find this declaration of compliance from Primex Plastics, along with other compliance declarations which Primex feels are relevant to the PPWR legislation.

Packaging waste EU

As a sheet extruder, and provider of sheet and roll stock to thermoformers, Primex is required to ensure that its products do not include heavy metals, hazardous substances, including PFAS.

Based on the information available to us from our raw material suppliers and our knowledge of the product compositions, please find that this statement advises that both Prime Virgin Grades and Recycled* grades from Primex are in accordance with the current PPWR framework requirements.

Primex's products are free from heavy metals and are designed for recyclability under current standards and its amendments: the sum of lead, cadmium, mercury and hexavalent chromium is below 100 ppm.

Furthermore, ahead of 2030 updates, Primex confirms that it is working on developments/ products to ensure fulfilment by the 2030 changes.

REACH

European Union regulation (EC) 1907/2006 requires Registration, Evaluation and Authorization of Chemicals (REACH) manufactured and imported into the European Union.

Primex Plastics as a processor of plastic granulate into sheet and roll stock material is aware of REACH regulation and committed to comply with the legal obligations arising from said regulation as well as to assist its customers in doing so.

Any supplier of an article containing a substance meeting the criteria in Article 57 (Substance of Very High Concern, SVHC) and identified in accordance with Article 59(1) (i.e. the substances on the Candidate List or on the Authorisation List) in a concentration above 0,1 % weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.

To fulfil this obligation Primex hereby certifies that our products do not contain Substances of Very High Concern above the threshold values laid down by the REACH legislation. We also declare that the product(s) comply with the restrictions listed in Annex XVII of REACH regulation.

EU RoHS

A directive (2002/95/EC, RoHS) restricting the use of hazardous substances in electrical and electronic equipment (EEE) has been in force since February 2003. The RoHS recast directive (2011/65/EU, RoHS 2) was published in 2011.

The RoHS 2 restricts the use of certain hazardous substances (lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, polybrominated diphenyl ethers) in electrical and electronic equipment (EEE). The Annex II was amended by a directive (EU) 2015/863 (RoHS 3) to add 4 phthalates onto the list of restricted substances under the RoHS 2.

As these restrictions are relevant to some of our customers, Primex hereby declares that none of the product(s) that we deliver to our customers contain any of the substances restricted by the EU RoHS regulations.

PFAS

The competent authorities from Germany, the Netherlands, Denmark, Sweden and Norway submitted a restriction dossier to restrict all PFAS (per- and polyfluoroalkyl substances) on 13 January 2023. The conformity of the restriction proposal was confirmed the European Chemical Agency (ECHA) committees on 22 May 2023. The dossier is very comprehensive and consist of Annex XV restriction report with 7 Annexes and 4 appendices. The submitted restrictions under consideration can be found at

ECHA website (<https://echa.europa.eu/en/restrictions-under-consideration/-/substance-rev/72301/term>). This group of chemicals contains thousands of substances. They are persistent and bioaccumulative in the environment and generate adverse effects on human health.

We note that PFAS are not intentionally added or used in the formulation or manufacturing of Primex's grades. Based on supplier declarations, products do not contain PFAS above detectable limits; however, routine analytical testing is not performed.

Conflict minerals

Conflict minerals, which contain columbite-tantalite (coltan), cassiterite, gold, wolframite and their derivative metals like sources of tin, tungsten and tantalum mined from the Democratic Republic of Congo (DRC) or its adjoining countries (DRC Countries: Angola, Burundi, Central African Republic, the Republic of Congo, Rwanda, South Sudan, Tanzania, Uganda, Zambia) are not used or intentionally added in manufacturing process during the production of this product.

Disclaimer

The information and conclusions of this declaration are based on information provided to Primex by suppliers, and on existing public information sources, such as current legislation, available at the time of publication of the declaration. The suppliers are responsible for ensuring the information provided to Primex is accurate and up to date. Please also know that this statement does not constitute an express warranty and that customers are responsible for determining suitability for their specific end-use application.
